

The Las Vegas CSI Foundation was established in May of 2001 and is a non profit 501 c3 tax exempt Foundation that supports student's scholastic efforts through the funding of scholarships. The scholarships are open to Nevada residents studying architecture, construction science and technology, engineering, landscape architecture, construction management, and interior design. The Las Vegas CSI Foundation is an affiliate of the Las Vegas Chapter Construction Specification Institute - a non profit organization who's mission is to improve the process of creating and sustaining the non residential built environment. They achieve that by facilitating communication among all those involved in that process through the standardization of specifications (the written construction documents) in two key aspects: writing and formatting. CSI membership consists of specifiers, architects, engineers, contractor, suppliers, and building owners.
